DISCLAIMER

This file is an audit carried out at the request of the interested party.

This report is based on a multitude of analyses and research carried out by our team according to a predefined scheme.

The various steps set out in this file will make it possible to display any vulnerabilities relating to the cybersecurity of the project studied.

These searches are based on the information available to us through the smart contract, but also through information provided by the project developers.

In order to have a better overview of the possible vulnerabilities of this project, the complete reading of this file is recommended.

However, even if this report is available to you, it is only an additional element that can help you in your investigations.

Although a great deal of background work has been done in our investigations, we may have missed some elements, so further research on your part is necessary and advisable.

The conditions mentioned above in the disclaimer are not optional, so if you are not satisfied with them, we strongly urge you to stop reading and analyzing this file and to destroy any copies you have downloaded and/or printed.

These analyses and conclusions are not intended as investment advice. SpyonCrypto is not responsible for any loss of capital, which you are the only owner of.

This report is provided to you as, and without any conditions guaranteed.

SpyonCrypto disclaims any and all liability to the law for any claim or demand by you or any other person for damages.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security.

No product code has been reviewed.

SUMMARY

PRESENTATION

NEWb is a deflationary token built on BSC.

They believe that providing new investors with education and support through community will empower their investment decisions.

NEWb aspires to be the one-stop-shop for crypto education.

The objectives are : earn and learn, rugpull education all this with community voice and transparency.

NEWbOfficial team has burned 30% of the current supply.

10% are allocated for our airdrop campaign.
The market allocation fund is 1.2% of the total supply.
1.5% of the total supply will be used for learn and earn concepts.
5.7% will be dedicated to the project's Research and Development (R&D).

Also, in each transaction, a total of 7% is taken from each transaction as described :

1% will be allotted and redistributed proportionally among holders
1% is taken away from every transaction to burn
5% of each transaction is added to the liquidity pool.

SECURITY ISSUES

MEDIUM

1 The function definition of "renounceOwnership" is marked "public".

However, it is never directly called by another function in the same contract or in any of its descendants. Consider marking it as "external" instead.

A FLOATING PRAGMA IS SET

The current pragma Solidity directive is ""^0.8.2"". It is recommended to specify a fixed compiler version to ensure that the bytecode produced does not vary between builds. This is especially important if you rely on bytecode-level verification of the code.

```
1  // SPDX-License-Identifier: MIT
2
3  pragma solidity ^0.8.2;
4
```

33%

WARNING: More than 30% of the total supply is accessible by the team.
We recommend to burn a part of it, that will benefit to the project. We are paying more attention to this because 30% is to much for the team in the sense that there is a high impact price.

NOTE AND CONCLUSION

This contract no contains any vulnerabilities and look like safe.

With this contract, without fails, the NEWB Token teams shows to everyone here, his professionalism.

Allocation team addresses:
0x0827ea3299461c22d19c73727259ae8d16b698a1

&

0x78c162ffffd5d39ca07da8fffcaf4f43f137cc6e
For 13% of the total supply

We think that 13% it's to much and we recommend to transert a part of it to the marketing allocation or to burn a part.

Marketing allocation address:
0xA9e546B0d471c4281b2d6A9821a1aD916C65a72D
For 0,95% of the total supply

We recommend to add more marketing allocation by transferring a part of the allocation team or of the airdrop allocation address

Airdrop Allocation address:
0x163212c9cb6b7111768a97319172e62f0f2d50af
For 8% of the total supply

8% it's to much for AirDrop we recommend to transfert a part of it to the marketing allocation or to burn a part.
